

BackgroundService

```
classDiagram
    class BackgroundService
    class ArandanoIRT_BackendInfrastructureServicesLogCleanupService["ArandanoIRT_Backend.Infrastructure.Services.LogCleanupService"]
    ArandanoIRT_BackendInfrastructureServicesLogCleanupService --|> BackgroundService
```

The diagram illustrates a class hierarchy. At the top is the 'BackgroundService' class, represented by a rectangle with three horizontal compartments. The top compartment contains the class name. Below it are two empty compartments. A blue arrow with an open triangular head points upwards from the 'ArandanoIRT_Backend.Infrastructure.Services.LogCleanupService' class to the 'BackgroundService' class, indicating that the former inherits from the latter. The 'ArandanoIRT_Backend.Infrastructure.Services.LogCleanupService' class is shown as a rectangle with three horizontal compartments. The top compartment contains the full class name. The middle compartment is empty. The bottom compartment contains two lines of text: a public constructor '+ LogCleanupService()' and a public method '# ExecuteAsync()'.

ArandanoIRT_Backend.Infrastructure.
Services.LogCleanupService

+ LogCleanupService()

ExecuteAsync()
